Instructional Technology and Distance Ed Blues

I must admit that I've been feeling a little edgy.
I've been putting my Facebook page where my course is supposed to be.

I must admit that I've been wondering if lately there are any teachers in distance ed that really get to me.

I must admit that I've been feeling a little rowdy. I want to shout out and make a scene just so you know that I am me!

*Simonson, Smaldino, Russell and Morrison, Clark, Kozma and Prensky, are the leaders now
Follow their guidance in education technology!*

*Hyperlinks and power points, I've got it now
Back to the screen where we meet, cite those sources now
Make sure all these technology tools work for me!*

I must admit that I've been feeling a bit neglected but only because my instructor always forgets to post my grades.
I must admit for every source I have rejected a hundred more are born from ProQuest and haunt me in the night.
I must admit that I've been singing a little loudly for some guidance in this process so I will know if I am right.

*Smaldino, Russell and Lowther, I can hear them now:
ASSURE their students. They are the leaders now
Follow their guidance in ed technology!*

*Know that we learn actively and independently
Internet capability and support are key
Your choices make the difference in distance ed for me!*
